

Shiraz University (History)

As an Iranian front-end of innovation, Shiraz University was established in 1946 in Shiraz, a city of mankind civilization and literature. Consistently ranked Iran's second-best comprehensive university, Shiraz University has been able to represent itself as a pioneer in many areas, such as establishing new majors in doctoral programs and E-learning in Iran, establishment of the university's International Division and in contributing towards shaping the future of the country's development by making connections with industrial groups and the private sector.

During the years of 1949 till 1977, schools of Medicine, Agriculture, Arts, Science, Engineering, Veterinary Medicine, Dentistry, Electronic, Education, and Law were established.

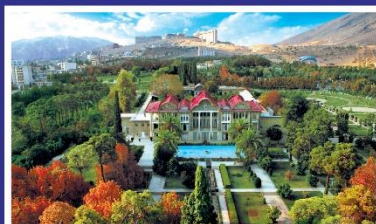

Presently, the university has about 17,000 students with 80 Bachelor's degree programs (B.A., B.Sc.), 183 Master's degree programs (M.A., M.Sc.), 102 Ph.D. programs, and one professional degree program (Doctor of Vet. M.).

Shiraz University is considered as a research-oriented academic institution which has about 700 faculty members with a significant percentage from world-class universities. It has expanded its research horizon extensively in the areas such as reservoir engineering, solar energy, Nano-Technology, Bio-Technology and IT.

The main mission of Shiraz University is to enrich the society's intellectual, cultural, scientific, economic and environmental spheres. Shiraz University will try to remain one of the leading universities in Iran and will extend its educational activities globally.

This university is proud to be regarded as the hall of fame to a great number of Iranian scientists, politicians, economists, sociologists, engineers and entrepreneurs, with about 50% of the Islamic World Renowned Scholars being selected among them.

Social Life & Student Clubs

The University welcomes the contribution made to student life by Clubs, Societies, Scientific Student Association and other organizations. With about 100 officially recognized societies to choose with more than 6500 student members. However, if you think that there is a gap to be filled, you can set up your own student society.

■ Shiraz

Shiraz, the provincial capital of Fars, is also known as the cultural capital of Iran, and the "City of roses and poets". It is the heart of Iran's history and a center for the rich Persian literary heritage. It has been the cradle of civilization and art for many centuries. Famous philosophers, thinkers and poets produced their masterpieces in this beautiful city. Shiraz is situated in a plain surrounded by two mountain ranges. It is located 900 km south of Tehran. It enjoys a mild climate and its magnificently impressive gardens have been famous from distant past.

■ International Affairs

As an International University, the university prides itself on its flourishing links with universities and academic institutions around the world. This goal is carried out through the activities of the Center of Academic & International Cooperations. This department aims to develop scientific and cultural partnership between Shiraz University and outstanding international universities. It also provides information and assistance to international students, faculty members and researchers. This center enhances opportunities for academic members and students to enjoy and participate in international conferences, seminars, workshops and projects. Contact Information: Center of Academic & International Cooperations, 4th floor, Main Administration Building, Jomhoori Eslami Blvd., Shiraz, Iran.

■ Persian Language Learning Program (PLLP)

In order to introduce the Iranian culture and extend the civilization for the world, Shiraz University provides services to those foreign students who are interested in learning the Persian language, Farsi, in a real interactive and cooperative context. The PLLP classes offered at Shiraz University are all taught by experienced academic members of the university, as well as making use of assistant technologies, such as language laboratories, audio-video tapes and computer programs. Students will also have access to libraries and information databases. After finishing their studies, students will have to take an exam, where qualified students will be awarded an official certificate approved by Iran's Ministry of Science, Research and Technology.
